

Message Centers for Religious Applications

Religious institutions worldwide are discovering the power of LED message centers to attract, inform and inspire! Whether your message requires full color video, high definition grayscale photography or simple monochrome messages, Optec manufactures a full line of long-lasting, high performance, energy-efficient outdoor LED displays to meet your specific communications and budgetary needs. Optec message centers come standard with control and message creation software and can be controlled directly on-premise or remotely via wireless or internet connection.
